PROJECTS

Maze Solver | Jul 2026

Tech: Java, Swing, AWT, DFS, Backtracking, Java2D

Created a Java desktop maze solver using DFS and recursive backtracking, tested on a 15×15 maze grid. Implemented maze generation, wall editing, pathfinding animation, and live statistics including visited nodes and recursion depth. Testing achieved 172 visited nodes, 79 maximum recursion depth, 17.259s solving time, and a 29-step path.

Career Guidance System | Apr 2026

Tech: React.js, Node.js, Express.js, MongoDB

Architected an AI-driven career counselling and aptitude-analysis platform on the MERN stack. Built independent frontend and backend services for a modular full-stack workflow. Designed an assessment engine with 12 aptitude questions across 4 categories and personalized recommendations across 22 career options using a weighted-sum matching algorithm.
